Manual for Green Product Scoring System

JKR

Jabatan Kerja Raya (JKR) Malaysia is a federal government department in Malaysia under Ministry of Works Malaysia which is responsible for construction and maintenance of public infrastructure in Malaysia such as roads, government buildings, schools, hospitals, airports, harbors, piers and related engineering works.

JKR Malaysia vision is to become a world-class service provider and centre of excellence in asset management, project management and engineering services for the development of the nation's infrastructure through creative and innovative human capital and state-of-the-art technology.

SIRIM

SIRIM Berhad is a premier total solutions provider in quality and technology innovations that helps industries and businesses to compete better through every step of the business value chain.

SIRIM Berhad is the centre of excellence in standardisation, facilitating industries and businesses in enhancing their production and competitiveness, protecting consumers' health and safety, and giving them the choice for quality products and services.

JKR/SIRIM STANDARD

JKR/SIRIM Standard is developed according to SIRIM standardisation procedures, which are in line with international practices that ensure appropriate participation of interested parties. As a standards development organisation, SIRIM Berhad has extensive expertise in standards research and consultancy which helps industries and businesses meet local and international requirements and practices.

JKR/SIRIM Standard is developed from JKR Malaysia initiatives as a technical advisory in infrastructure development for the Government of Malaysia through collaboration with SIRIM which provides requirements, specifications, guidelines or characteristics that can be used to ensure that materials, products, processes and services are fit for their purpose.

JKR/SIRIM Standard is developed through consensus by established committee, which consists of experts in the subject matter. The use of this standard is voluntary, and it is open for adoption by regulators, government agencies, associations, industries, professional bodies, etc.

Foreword

This standard was developed by the Project Committee on Green Product Scoring System established by SIRIM Berhad.

This standard was developed with the following objectives:

- a) to provide a systematic and structured assessment system for green products in building and road projects;
- b) to measure the number of green products used in building and road works;
- c) to educate and create awareness among the stakeholders on green products and services; and
- d) to encourage manufacturing industries to apply for green product certification based on the current criteria by independent certification body.

This standard will be subjected to review to reflect current needs and conditions. Users and other interested parties may submit comments on the contents of this standard for consideration into future versions.

Compliance with this standard does not by itself grant immunity from legal obligations.
